

When High Current Income meets Low Volatility,

You may Invest with Confidence

Company Overview

The Mid Atlantic Secured Income Fund LLC is a specialized lending institution structured as a private debt (or 'note') fund. We raise capital from individual investors, financial institutions, and other corporate structures and invest it by originating, funding, and servicing carefully structured real estate secured loans. Our portfolio primarily includes short-term first position mortgage loans on residential properties. The loans are intended for new construction, renovation, redevelopment, and other financing needs associated with companies engaged the development and construction of real estate.

Our unique approach provides investors with the security and stability of collateralized investments while actively supporting local businesses and creating much needed housing opportunities within their communities.

We are headquartered in Atlanta, GA and since 2010 we have facilitated financing for building or improving 500+ properties in Georgia, and the greater mid-Atlantic region. Our growing team boasts a collective experience of over 60 years of lending and risk management experience while working with the countries most prestigious financial and real estate firms.

Investment Strategy

The Fund seeks to provide investors a high current income with an emphasis on capital preservation. We balance this with flexible investment terms, industry leading liquidity options, and low volatility to create the best fixed income product on the market today!

Monthly interest payments from our borrowers are received, pooled, and passed automatically to our investors, ensuring a consistent and dependable income stream. Our loan portfolio is backed by 1st position liens on real estate utilizing very low loan-to-values. This collateral value cushion protects against losses in our investments and shields investor principal.
